Summary

Full-stack developer with 4+ years of experience building web, mobile, and desktop applications, and an early adopter of AI-assisted development: I build and ship complete products using **Claude Code** as my primary development tool (with additional experience in Codex). Strong foundation in JavaScript/TypeScript, Node.js, Angular, .NET, and databases such as PostgreSQL and SQL Server, with deployments on Azure and AWS and CI/CD pipelines on GitHub Actions and Azure DevOps. Used to taking a specification or a loose idea and turning it into working, production-ready software, owning projects end-to-end.

Featured Projects

FORM 606 TAX AUTOMATION — Own product, built with Claude Code | 2026

github.com/Arturo21th/automatizacion-606

- Desktop application that automates the Dominican Republic's monthly purchase-tax filing (DGII Form 606): reads invoices from photos using the Claude vision API, validates tax IDs (RNC), fiscal receipt numbers (NCF), and tax math, and generates the official submission files.
- Built end-to-end with Claude Code (agentic AI workflow): from concept to an installer distributed to real users in a matter of days.
- Validation engine replicating the government's official validator rules (RNC/ID check-digit algorithms, fiscal receipt formats) to guarantee correct filings.
- CI/CD with GitHub Actions: every push automatically builds and packages the Windows installer (PyInstaller + Inno Setup).
- Multi-company support; in use by real users and being prepared for sale as a product.

COOKIEBOO — Mobile loyalty app, built with Codex | 2025–2026

github.com/Arturo21th/CookieBooApp

- React Native + TypeScript mobile app for a bakery business: a digital stamp loyalty card where customers earn stamps when the courier scans a QR code with the phone camera.
- Full authentication with Firebase (sign-up, login, password recovery) and real-time data with Cloud Firestore.
- Three user roles: customer (stamp card), courier (built-in QR scanner), and admin (role management, stamp-card lookup, and broadcast push notifications via Firebase Messaging).
- Built with Codex, OpenAI's agentic development tool — the same AI-assisted workflow applied with a different tool.

Experience

DEVELOPMENT & DATA ANALYST | SEGUROS CRECER | AUG 2025 – PRESENT

- Reporting development with Jaspersoft and issue resolution across web and desktop applications (C#, Visual Basic, Vue.js).
- Database management and advanced querying with SQL and PL/SQL.

JR. PROGRAMMER ANALYST | AMADITA | JUL 2023 – AUG 2025

- Full-stack web and mobile development with Flutter, .NET Framework, Angular, and JavaScript.
- Designed and implemented RESTful APIs in close collaboration with the mobile development team.
- Built new features and maintained frontend and backend of applications in production.

JR. PROGRAMMER ANALYST | BBXCARGO | JUL 2022 – MAY 2023

- Web and mobile development with Flutter, WordPress, .NET Framework, Angular, and JavaScript.

FREELANCER | JUL 2022 – PRESENT

- Web and mobile application development for clients, owning projects end-to-end: requirements, development, deployment, and iteration.

PROGRAMMING INTERN | EDEESTE | JUL 2019 – AUG 2019

Technical Skills

- **AI-assisted development:** Claude Code and Codex (agentic workflows), Claude API integration (vision, structured outputs).
- **Languages:** JavaScript/TypeScript, C#, Python, SQL.
- **Backend:** Node.js, NestJS, .NET (MVC, Entity Framework, LINQ), RESTful API design.
- **Frontend:** React Native (TypeScript), Angular, Vue.js, Ionic (hybrid apps and PWAs using Geolocation, Camera, IndexedDB, Push), HTML, CSS/Sass.
- **Databases:** PostgreSQL, SQL Server, SQLite, Firebase, MongoDB.
- **Cloud & DevOps:** Azure (Azure SQL, API Management, Web Services), AWS, Docker, GitHub Actions, Azure DevOps (CI/CD), Git/GitHub.
- **Methodologies:** SCRUM and agile teamwork.

Education

- **Associate Degree in Software Development** | 2022 – present | Instituto Tecnológico de Las Américas (ITLA)
- **Technical High School Diploma, Software Development** | 2016 – 2020 | Instituto Técnico Salesiano (ITESA)

Languages

- English: advanced (fluent written and spoken communication).
- Spanish: native.

Soft Skills

Clear, proactive communication (reporting progress and flagging blockers early), independent work and sound decision-making, problem solving, adaptability to new technologies, attention to detail.

Certifications & Awards

- SCRUM Fundamentals.
- SQL Server 2016: Database Development.
- Programming fundamentals and object-oriented design coursework.
- 4th place, Dominican Informatics Olympiad (ODI) — programming competition.
